Where did God live before he created heaven and earth? According to the Judeo-Christian tradition and tenets, God created heaven and earth and placed Adam in the Garden of Eden. Where did God come from? If God created us, then who created him? Where did he come from?

We were listening to a song on the radio. It sounded like it could have been by The Doors, though searching on them has proved fruitless. It was just freaky. The final line was "and where was God?" We were all so dumbstruck, we missed the name of the band or song if it was given. God created.
